

Intellectual Property

- Removing barriers to movement of goods
- Reducing entry barrier to start-up companies

ISA Vision Summit 2006 Round Table Discussion with Hon Minister for IT & Communication Shri Dayanidhi Maran.

ISA Vision Summit 2008

ISA also holds its Vision Summit every year. The next ISA Vision Summit (February 18–19, 2008, Bangalore, India) is to be held under the title “Evolving Domestic Market: Growth driver for Indian electronics ecosystem”. A growing domestic market is seen as being the key driver for the growth of the electronics industry in India with its population of more than 1 billion people. To address demand, international electronic manufacturing services (EMS) companies are setting up bases in the country. It is expected that India will become a major electronics manufacturing hub during the period to 2009.

The design services industry is slowly evolving towards making products for the domestic market. Complex designs are being created out of the needs of this geography and demography. These are increasing signs of a maturing design industry in the country.

Highlights of the meeting include: a country forum; focused vertical meetings covering telecom, information technology (IT) and office automation; a networking platform; one-on-one meetings; a gala dinner; luncheon receptions.

Confirmed speakers include: Stanley T. Myers, President and Chief Executive of

www.semiconductor-india.com | October 2007

the Semiconductor Equipment and Materials International (SEMI) industry organisation; Malcolm Penn, Chief Executive of electronics market analyst company Future Horizons; Deepak Puri, Managing Director of Moser Baer, a developer and manufacturer of removable electronic storage media.

ISA is looking for attendance from business and technology leaders, venture capitalists, analysts, academia, policy makers, and global media. Sponsorship opportunities are also available. Current sponsors include Applied Materials, ARM, Cadence Design Systems, Cypress Semiconductor, Freescale Semiconductor, IBM, Infineon, KPIT Cummins Infosystems, Mentor Graphics, MIndTree Consulting, SanDisk, STMicroelectronics, Synopsys, Tensilica, Wipro.

The ISA Vision Summit in 2007 attracted more than 300 delegates with participation from CEOs, policy makers, academia, venture capitalists and others. The focus of the 2007 summit was global competitiveness of the Indian semiconductor industry
