On-site fluorine generation

Advanced electronic gases filling plant in Munich

Ultra-high purity bulk gases

# Linde Electronics

Formed when Linde AG acquired The BOC Group plc in September 2006, The Linde Group is the world's largest industrial gases and engineering company, employing more than 50,000 people in over 70 countries.

## Combined capabilities

Linde Electronics, formed from the Linde and BOC electronic gases businesses, is a leading global supplier to the semiconductor, flat panel display, solar cell, and electronic packaging industries.

The company has capabilities in a wide range of areas, including:

- Ultra-high purity bulk gases and on site gas production
- Electronic special gases in cylinder and bulk supply
- Wet process chemicals
- On site fluorine generators
- Gas recovery & recycling technology
- High purity gas delivery systems
- Eco-Snow CO<sub>2</sub> precision cleaning solutions
- Design & project management
- Total material management services

## New Materials and Technology

Linde Electronics understands the changing material requirements of the semiconductor industry and maintains R&D programs to match the material needs and delivery modes of the ITRS roadmap.

With increasing pressure on the availability of certain gases, and the urgent need to reduce emissions of harmful global warming gases, Linde Electronics has developed innovative technology for recovery and reuse of critical molecules such as Xenon and SF<sub>6</sub>.

## India's leading industrial gas supplier

BOC India was founded in 1935 in Kolkata, where it is still headquartered today. Through seven decades of operations, it has established itself as the leading provider of complete gas solutions to Indian industry. BOCI embodies the best of international technology and safety standards. With more than 20 production facilities, including one of Asia's largest air separation units; 40 warehouses and depots; 100 dealers; more than 100 dedicated tankers in the distribution fleet; - BOCI provides an extensive geographic reach, thus bringing it closer to its customers in any part of the country.
